

Marcos Dias de Assunção

<http://www.marcosassuncao.me>
assuncao at acm.org

With over 16 years of experience in research and development in distributed systems and networks, I have published over 40 papers and more than 20 patents (deposited or ongoing). I have also contributed to the design and development of several software systems. I am also an Australian permanent residency holder.

EDUCATION	Postdoc at Inria 2009 – 2011 Laboratoire de l'Informatique du Parallélisme (LIP) École Normale Supérieure de Lyon, France
	Ph.D. in Computer Science and Software Engineering 2005 – 2009 Supervisor: Associate Prof. Rajkumar Buyya Department of Computer Science and Software Engineering The University of Melbourne, Australia
	M.Sc. in Computer Science 2002 – 2004 Supervisor: Prof. Carlos Becker Westphall Department of Informatics and Statistics Federal University of Santa Catarina, Florianópolis, Brazil
	B.S. in Computer Science 1997 – 2001 University of Western Santa Catarina, Videira, Brazil
EXPERIENCE	Researcher Jun. 2014 – present Inria, French Institute for Research in Computer Science and Automation École Normale Supérieure de Lyon Lyon, France <ul style="list-style-type: none">• Investigating resource elasticity for data stream processing and big-data frameworks.• Segment-routing traffic engineering (SPRING) algorithms to reduce the over-provisioning of core networks and minimise energy consumption.• System prototyping using FPGAs and Xilinx tools.• OpenFlow and Software Defined Network (SDN) solutions.
	Research Scientist Jul. 2011 – Mar. 2014 IBM Research São Paulo, Brazil <ul style="list-style-type: none">• Research on workload migration and Cloud computing.• Scheduling and optimisation of incident management systems.• Cloud enabled solutions for data analytics, Hadoop, InfoSphere Streams.
	Postdoctoral Researcher Sep. 2009 – Jun. 2011 Inria, French Institute for Research in Computer Science and Automation École Normale Supérieure de Lyon Lyon, France

- Postdoctoral research on energy efficiency of large-scale distributed systems such as Grids and Clouds.
- Investigated the benefits of using virtual machine technologies to consolidate the workload of multi-layer applications.
- Analysed logs on energy consumption of Grid sites.
- Investigated metrics for procuring energy efficient storage solutions.

Ph.D. Student **Mar. 2005 – Jul. 2009**
The University of Melbourne
 Melbourne, Australia

- Full time Ph.D. in Computer Science and Software Engineering.
- **Overview of the Ph.D. research:** My thesis presented mechanisms for resource allocation across Grids, and the work evolved into a system to deploy and manage virtual machines across multiple computing sites and commercial Cloud computing providers. The system uses virtual machine technologies such as Xen, OpenNebula infrastructure manager and Amazon Elastic Compute Cloud (EC2). The work explored the benefits that organisations can reap from using Cloud providers to augment the capacity of their local clusters.

Research Visitor **Sep. 2006**
University of Bayreuth
 Bayreuth, Germany

- Collaborated with Professor Torsten Eymann’s team to extend a Grid computing simulator ([GridSim](#)) to consider the economic mechanism designed in the scope of the [CATNETS](#) project.

Lecturer **Jan. 2003 – Mar. 2005**
University of Western Santa Catarina
 Videira, Brazil

- Taught the following subjects to undergraduate students: computer networks, computer programming using Java, introduction to computer programming, and programming for Web environments.
- Advised three students during their final year projects.

MSc. Student **Mar. 2002 – Feb. 2004**
Federal University of Santa Catarina
 Florianópolis, Brazil

- As master student, investigated mobile software agents, multi-agent systems, Grid computing using agents, network/systems management, and SLAs.
- Developed tools and applications for network and systems management using Java (J2SE), MySQL and XML technologies.

Computer Programmer **May 2000 – Mar. 2002**
Conexão Oeste Ltda (ISP)
 Joaçaba, Brazil

- Worked as system administrator of an Internet service provider, managing Web servers, RADIUS, DNS, databases, MTAs and Webmail services.
- Developed Web applications using ASP, PHP, MySQL, SQLServer, and desktop applications in Object Pascal/Delphi.

Computer Programmer **May 1998 – Apr. 2000**
Fischer Fraiburgo Agrícola
 Fraiburgo, Brazil

- Carried out hardware and system maintenance.

- Managed Novell file servers, MS Windows NT servers, MS Exchange servers and TCP/IP networks.

Computer Technician **Jun. 1997 – May 1998**
Vipnet Computadores Ltda
 Fraiburgo, Brazil

- Assembled personal computers and carried out hardware maintenance.
- Developed desktop applications in Object Pascal/Delphi.

Assistant Electrician **Apr. 1994 – Oct. 1996**
Neon Eletro Comercial Ltda
 Fraiburgo, Brazil

- Worked as an assistant electrician performing the wiring of residences and related equipments.
- Carried out the deployment and maintenance of industrial electrical panels.
- Repaired in electrical and electronic devices.

AWARDS

IBM Research Division Award, 2013.
 Contributor to a project that won an IBM Outstanding Achievement Award, 2012.
 National ICT Australia Studentship (NICTA), Mar. 2005 – Mar. 2009.
 Australian Government International Postgraduate Research Scholarship (IPRS),
 Mar. 2005 – Mar. 2009.
 Coordination for Improvement of Graduate People (CAPES) Scholarship,
 Mar. 2002 – Mar. 2003.

COMPUTER SKILLS

Java, Python, Pascal, JavaScript, PHP, Perl, LaTeX, SQL, XML, C, Objective-C.
 CVS, Subversion, Eclipse, Git, Rational Team Concert.
 Hadoop, MapReduce applications, Stream processing frameworks
 Linux, MacOS X, Windows.
 Virtual machine technologies, Internet services.
 Knowledge on Internet protocols.

PARTICIP. IN RESEARCH PROJECTS

SR Inria (2016–): Starting Researcher (SR) grant Inria.

STAR (2014–2015): SwiTching And tRansmission; supported by the European Coordinated Research on Long-term Challenges in Information and Communication Sciences & Technologies ERA-Net (CHIST-ERA) initiative, with the goal to investigate and prototype routing mechanisms to improve energy efficiency of core networks.

IBM Research (2011–2014): Participation in internal, IBM funded research projects on workload migration, platforms for analytics as a service, easy deployment of big data applications, and resource auto-scaling for cloud computing.

PrimeEnergyIT (2010–2011): An initiative operated by a consortium of national agencies and research institutions in cooperation with a number of associate partners from industry.

Green-Net Project (2009–2010): Power-aware software frameworks for high performance data transport and computing in large-scale distributed systems; supported by INRIA, France.
